Concise writing does not always have the fewest words, but it always uses the strongest ones. Writers often fill sentences with weak or unnecessary words that can be deleted or replaced. Words and phrases should be deliberately chosen for the work they are doing. Like bad employees, words that don't accomplish enough should be fired. When only the most effective words remain, writing will be ...

In propositional logic, transposition is a valid rule of replacement that permits one to switch the antecedent with the consequent of a conditional statement in a logical proof if they are also both negated.It is the inference from the truth of "A implies B" the truth of "Not-B implies not-A", and conversely. It is very closely related to the rule of inference modus tollens.

Logic and metaphysics. Aside from Herbart ' s textbook presentation of traditional logic (e.g., Section II of LEP), his main logical innovation is his so-called method of relations, devised as an organon for correct metaphysical thinking (SW V: 201, f.). The metaphysical problems it aims to address include: the thing as (one) substance with (many) characteristics; causality; matter; and the ...

Academic writing should be concise; that is, you should use no more words than necessary to convey your meaning clearly. In some cases, the more words you include, the harder it is for the reader to extract your meaning. Most of us use far more words than necessary in a first draft; achieving concise writing usually requires several revisions.
