In an in-depth study of how COVID-19 affects a patient's brain, National Institutes of Health researchers consistently spotted hallmarks of damage caused by thinning and leaky brain blood vessels in tissue samples from patients who died shortly after contracting the disease. In addition, they saw no signs of SARS-CoV-2 in the tissue samples, suggesting the damage was not caused by a direct ...

The brain's development begins soon after conception, when cells in the embryo begin to form the basic structure of the central nervous system including the brain and spinal cord. How it develops is influenced by genetics, aspects of the environment such as nutrition and social interactions, and life experiences. The relative importance of these influences shifts over the course of life, and ...

Recent research is telling us a lot about the brain when it comes to watching porn. Over a decade ago, Dr. Judith Reisman called porn an “erototoxin,” theorizing that the brain itself might be damaged while watching porn. She speculated that future brain studies would reveal that the surge of neurochemicals and hormones released when someone watches porn has measurably negative effects on ...
